DATE MAILED:

**Please find below and/or attached an Office communication concerning this application or proceeding.**

Commissioner for Patents

The reply filed 28 March 2005 is not fully responsive to the Office communication mailed 28 October 2005 for the reason(s) set forth below or on the attached Notice To Comply With The Sequence Rules or CRF Diskette Problem Report.

Since the above-mentioned reply appears to be *bona fide*, applicant is given a TIME PERIOD of **ONE (1) MONTH or THIRTY (30) DAYS** from the mailing date of this notice, whichever is longer, within which to supply the omission or correction in order to avoid abandonment. EXTENSIONS OF THIS TIME PERIOD MAY BE GRANTED UNDER 37 CFR 1.136(a).

The sequences displayed in Figures 35 and 36, and listed as SEQ ID NOs: 7 - 10 do not correspond to the claimed sequences. The brief description of Figures 35 and 36, found on pages 29 and 30 of the specification, indicate that instantly claimed sHlgM22 differs from the reference sequence. The heavy chain (Fig 35, SEQ ID NOs: 7 and 8) has two amino acid changes relative to the reference sequence, at residues 50 and 85. However SEQ ID NO:7 does not show a variable (Xaa) residue at either position. Furthermore there is an insertion in the sequence listing relative to Figure 35. Residues 85 - 90 in Figure 35 (D/E - D - T - A - V - Y) correspond to residues 89 - 94 in the paper copy of SEQ ID NO:7.

The light chain (Fig 36, SEQ ID NOs: 9 and 10) also indicates variable residues at positions 45 and 89, but there are not corresponding variable residues in the paper sequence listing. As with the heavy chain, there appears to be an insertion; the residue numbers in the paper sequence listing of SEQ ID NO:9 are one less than the corresponding residue numbers in Figure 36. Appropriate correction is required prior to examination.
